## Build a guest app for your accommodation

When the most important thing is the guest, Criton offers a cost-effective solution to:

- reduce guest questions,
- improve guest satisfaction
- improve asset management.

The Criton app builder lets accommodation providers create their own custom, branded **guest information app**.

It's a digital concierge which gives your guests access to your recommendations on where to go, eat and drink, when they are out and about. It also allows you to upload information on how to operate appliances in your accommodation including instruction videos for those tricky items which a video simplifies.

Change the way your guests interact with you by ensuring your thoughtfully produced, personal and authentic information is easily accessed by your guest at all times.
